

Health and Safety Leadership

Atkins acknowledges its potential to influence change in occupational health and safety management. We are committed to providing and maintaining a safe and healthy working environment for our employees and to ensuring the safety of others affected by our operations.

We have implemented a Safety Management System framework that manage and control our health and safety risk effectively. We are committed to ensuring that the aspirations of our corporate policy are achieved.

We pursue this commitment by:

- Applying a risk-based approach to setting health and safety objectives;
- providing appropriate training, information and supervision to ensure that personal responsibilities are discharged in a safe, reliable and competent manner;
- providing adequate funding and resources that contribute towards a safe and healthy working environment;
- complying with occupational health and safety legislation and, as appropriate, other codes of practice, standards, or requirements as may be specified by our clients;
- implementing arrangements for managing emergency situations, accidents, ill-health and first aid;

- promoting a vibrant safety culture through effective two-way communication and participation;
- monitoring planned arrangements and our performance against stated objectives;
- continually improving the effectiveness of the management system, to ultimately improve overall health and safety performance;
- proactively working with the industry to improve health and safety.

Management systems are maintained to meet and exceed the requirements of International Standard ISO 18001:2007 (Occupational Health and Safety Management Systems).

We look to our employees' support and professionalism in making this policy truly effective on behalf of Atkins China.

Samson Sin
Managing Director
